

Electrical Safety for Every Industry

About Bender Inc.

Bender Inc., headquartered in Exton, PA, stands as a market leader for electrical safety products. Bender is proud to be ISO 9001:2015 certified to guarantee the very best quality.

In addition to a solid lineup of ground fault relays, isolation monitors, ground fault location systems, resistance grounding systems, and isolation power systems, Bender manufactures integrated solutions for a variety of industries.

Since the very beginning, Bender has been committed to using innovative technologies to find solutions for your application to guarantee the very best in electrical safety.

Solutions for

- Ground fault location and detection
- High resistance grounding
- Low resistance grounding
- Voltage and current monitoring

Our Industries

Healthcare

Isolated Power Panels with automatic fault location help mitigate electric shock and interruption of power in operating rooms and ICUs.

Electric Vehicles

Bender provides insulation monitoring devices and ground fault detectors for EV and EVSE.

Manufacturing

Fault location capabilities of Bender EDS and HRG systems can minimize downtime of continuous process manufacturing industries.

Mining

For 75 years, our ISOMETER® series has been a critical component in keeping mines safe.

Energy Storage Systems

Bender solutions monitor the integrity of the power source and DC bus to greatly reduce the risk of catastrophic battery and equipment failure.

Rail

Insulation monitoring detects ground faults in signaling and control systems to minimize the risk of false or no operation from the equipment.

Oil & Gas

Insulation fault detection and location with the Bender Iso685 series quickly identifies and locates faults to prevent fires on drilling platforms.

Water & Wastewater

Our RCM and NGRM products provide advanced levels of protection to minimize down time and protect process critical drives, motors and pumps.
